

When the center sparkles and glows with lights and decorations it makes everyone feel festive and full of pride in their community during the holiday season. Lighting and decorating Lexington Center each holiday season takes lots of effort by many people and is quite costly. The Town of Lexington does not financially support this program; it is funded entirely with donations from generous members of the community. Only energy-efficient LED lights are used in the center and all funds

donated are used *only* for lighting and decorating during the holiday season.

If you enjoy the center during the holidays, please consider making a donation. The Holiday Lighting Committee works very hard with the folks from the Lexington Public Works Department to make it all happen, but it can't be done without help from individuals and businesses.

Donate today and THANK-YOU!
